

Class Description:

## **Greek Math Mini Beads**

These small, self-supported beads are the companions to the larger, more complex Greek Math (formerly Archimedes) Beads. Minis use the same idea of creating round beads by using simple geometry. Dress Minis up with different sizes of seed beads, embellishment, and crystal bicones. Learn several beads and spacers that utilize similar structures to create a wide variety of beaded beads.

**Intermediate Level:** Students *MUST* be able to create a right angle weave tube without assistance.

**Class Running Time:** 6 hours
