

Class Description:
Woven Mariposa

Engineering and freeform sculpture merge in the creation of an incredible butterfly pendant. Working with an ordered sequence of ideas, guidelines and sizes, students will create one-of-a-kind butterflies inspired by the real thing or the imagination. The light, hand-woven filigree wings move, making it as fun to play with as it is to wear. Beads add dynamic color, and an architecturally-inspired bail attaches the pendant to a chain to finish. Amaze yourself!

Intermediate Level: *Students know how to turn a round loop, make a spiral, and be comfortable working with heavy and light gauge wire*

Class Running Time: 6 hours

This class will be available to book starting December, 2007.
